

Management & governance

A fixed-fee engagement to structure your resilience for the long run.

Fixed fee

scope and duration agreed together

FORMAT

Fixed-fee engagement

DURATION

Several months,
depending on scope

DELIVERY

Mainly on your premises

PREREQUISITE

Objectives and scope set
in contract

The service at a glance

The operational resilience management and governance service is a fixed-fee engagement designed to help companies build robust resilience management structures. It suits organisations that want to identify specific needs and shape a contract around their own requirements, rather than buy a standardised package.

The three pillars of the engagement

01

Fixed-fee engagement

We define the objectives together and precisely: operational resilience, project management (an audit, for instance) or regulatory compliance.

02

A complete framework

Building an end-to-end resilience management framework, making sure the chosen strategies are aligned with your organisation's real needs.

03

On-site delivery

A large share of the work is carried out on your premises: direct collaboration with your teams and a close understanding of your operational stakes.

Areas of intervention

- Governance and steering of operational resilience
- Project management, including audit preparation and follow-up
- Requirements of other jurisdictions, including Asia
- Design and rollout of a resilience framework
- Regulatory compliance (DORA in Europe)
- Optimisation and documentation of critical processes

Objective

To equip your company with the tools and strategies needed to navigate a constantly changing environment, while ensuring regulatory compliance and process optimisation.

A tailored approach

This service is built on a personalised, adaptable approach: scope, pace and deliverables are calibrated so that you receive the support that genuinely strengthens your governance.
